## INAPPROPRIATE OPERATION AND CONTROL RECORD [SKYACTIV-G 1.3, SKYACTIV-G 1.5]

id0102q1162300

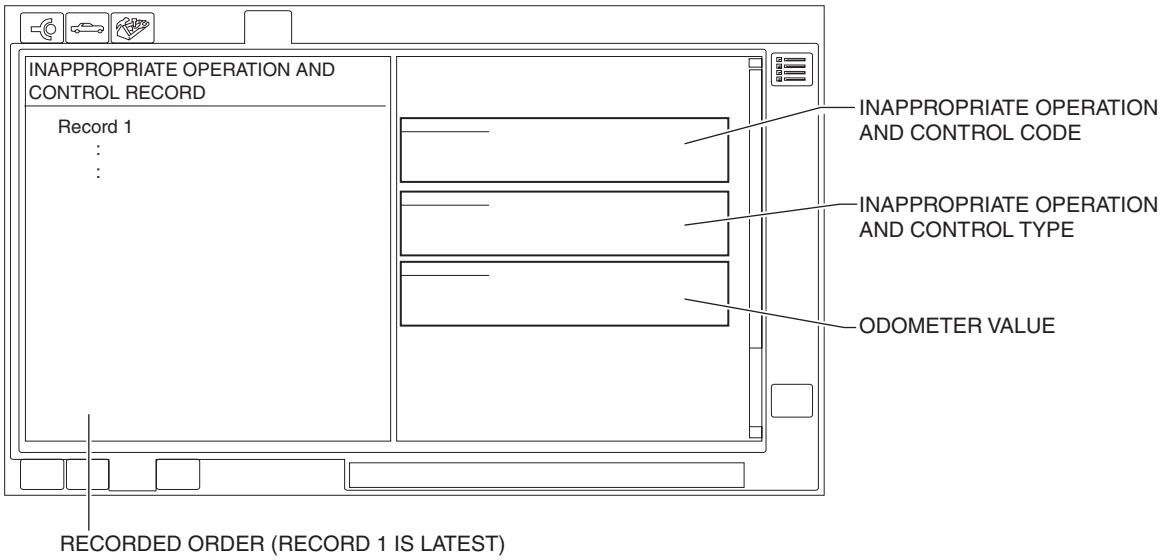

**Purpose**

- For the purpose of protecting passengers and the vehicle, the PCM performs protection control according to the vehicle driving conditions/environment surrounding the vehicle.
  The inappropriate operation and control record of the protection control executed by the PCM can be displayed using the Mazda Modular Diagnostic System (M-MDS) and it can be used during malfunction diagnosis.

**Function/display**

- The PCM records the following information as an inappropriate operation and control record.
  - — Inappropriate operation and control code
  - — Inappropriate operation and control type
  - — Odometer value
- The Mazda Modular Diagnostic System (M-MDS) reads out the inappropriate operation and control record and indicates it as shown in the figure below.
