CYLINDER BLOCK [SKYACTIV-G 1.3, SKYACTIV-G 1.5]

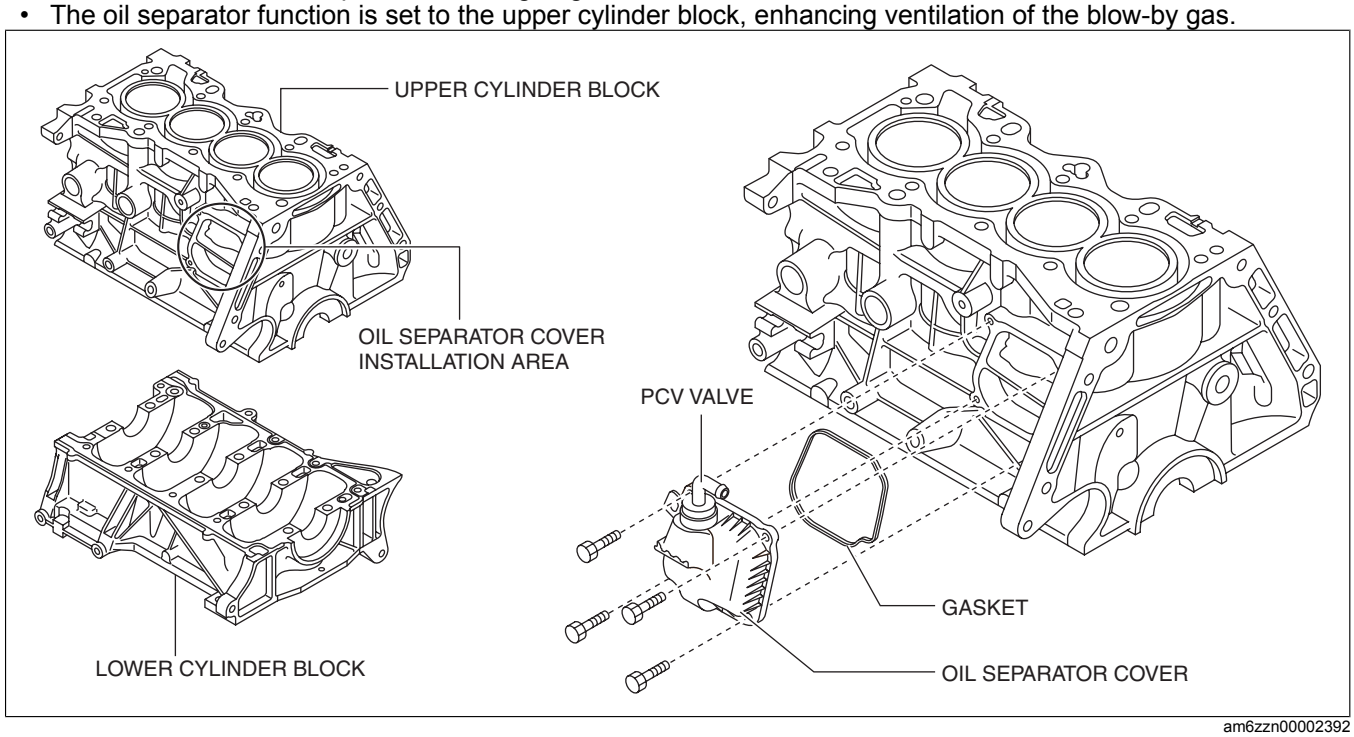

id0110q3000500

Purpose, Function

- The cylinder block forms the cylinder and crankcase.

Construction

- The cylinder block consists of the upper cylinder block and lower cylinder block.
- The lightweight cylinder block is made of aluminum alloy with excellent heat dispersion.
- With the adoption of the lower cylinder block, the coupling rigidity of the transaxle and support rigidity of the crankshaft have been improved reducing engine vibration.
- The oil separator function is set to the upper cylinder block, enhancing ventilation of the blow-by gas.
