DRIVE BELT [SKYACTIV-G 1.3, SKYACTIV-G 1.5]

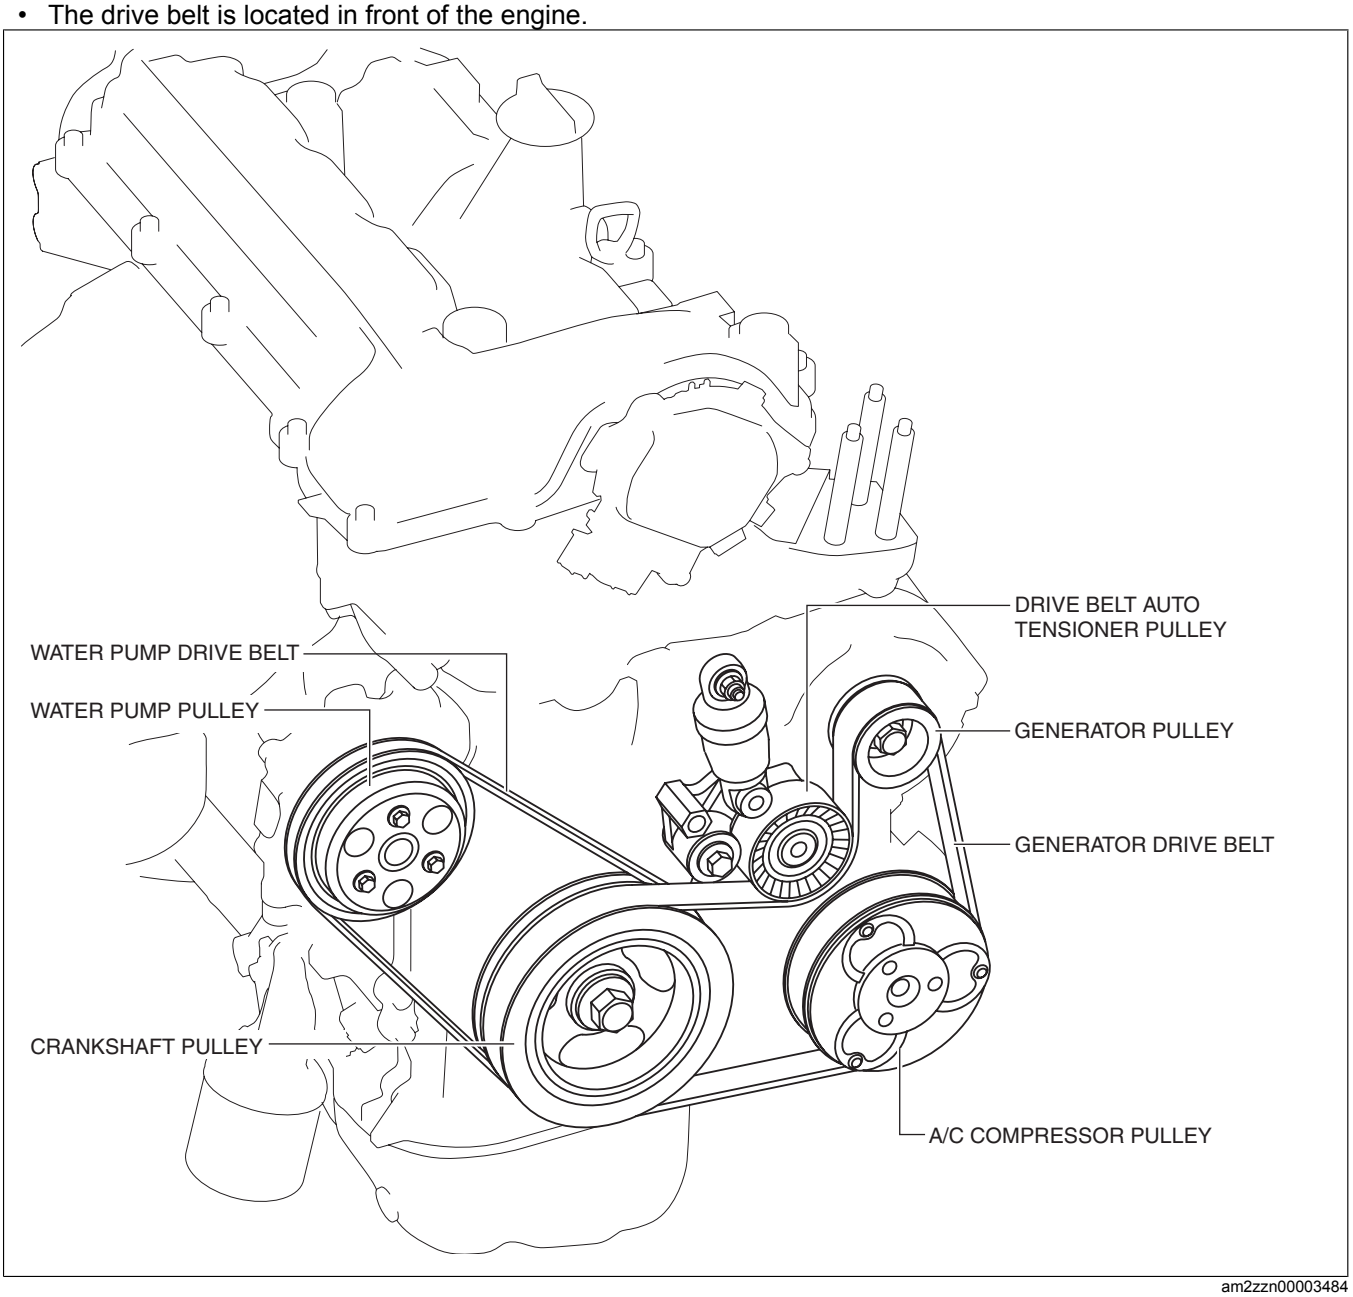

id0110q3001100

Purpose, Function

- The drive belt transmits rotation force of the crankshaft pulley to the pulley for the auxiliary parts.

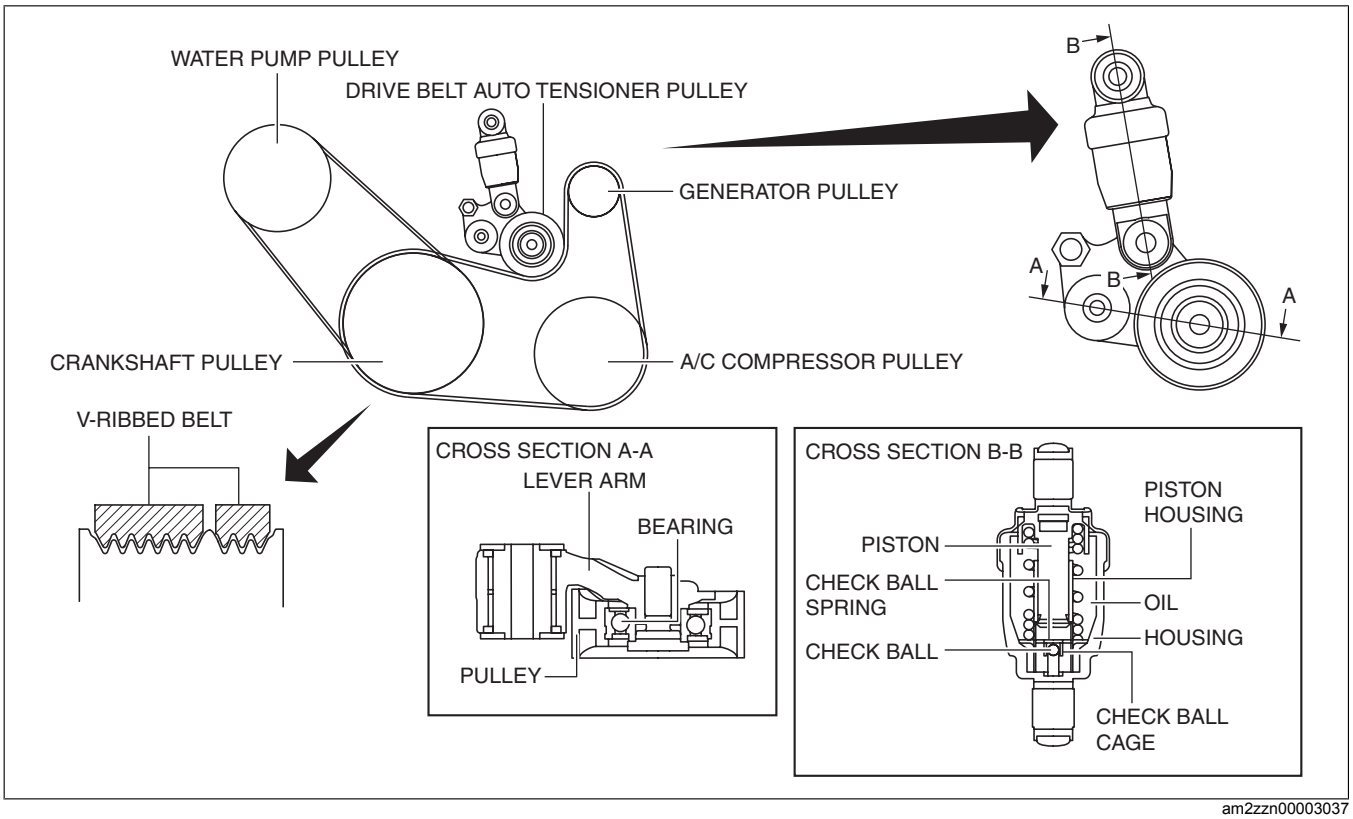

Construction

- The drive belt is located in front of the engine.

am2zzn00003484

- A V-ribbed belt has been adopted for the drive belt.
- The water pump drive belt is a stretch type.
- Drive belt vibration is suppressed by shortening the distance between each pulley.
- With the adoption of the oil pressure type drive belt auto tensioner, the change in tension by the oil pressure damper operation is absorbed. As a result, the sliding resistance has been reduced by lowering the drive belt tension setting.
