BAROMETRIC PRESSURE (BARO) SENSOR [SKYACTIV-G 1.3, SKYACTIV-G 1.5]

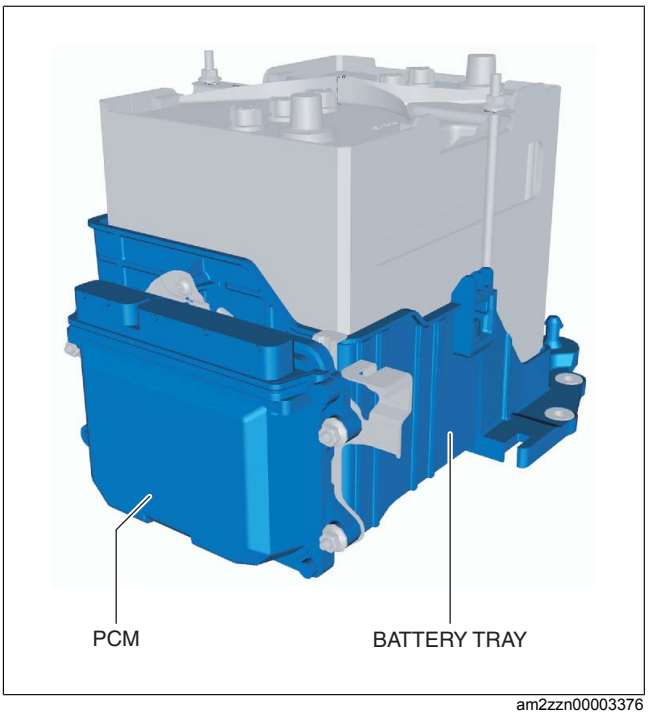

id0140q1006000

Purpose/Function

- Detects the BARO as basic information (mainly used to determine the fuel injection amount) and sends it to the PCM as a BARO signal.
- PCM internally detects atmospheric pressure.

Construction

- Built into the PCM.
- A piezoelectric element has been adopted for detecting the BARO.

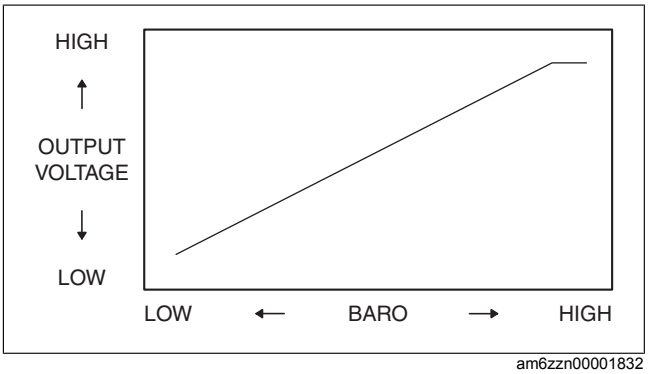

am2zzn00003376

Operation

- Sends the signal, which fluctuates according to the BARO, to the PCM.

BARO sensor characteristic

am6zzn00001832

Fail-safe

DTC No.	Fail-safe function
P2226:00	• Fixes the barometric pressure for the engine control at **101.32 kPa {1.0332 kgf/cm^2, 14.695 psi}**.
P2228:00	• Fixes the barometric pressure for the engine control at **101.32 kPa {1.0332 kgf/cm^2, 14.695 psi}**.
P2229:00	• Fixes the barometric pressure for the engine control at **101.32 kPa {1.0332 kgf/cm^2, 14.695 psi}**.
