## SPEED SENSOR ASSY (TURBOCHARGER WITH VARIABLE TURBINE GEOMETRY) [SKYACTIV-D 1.5]

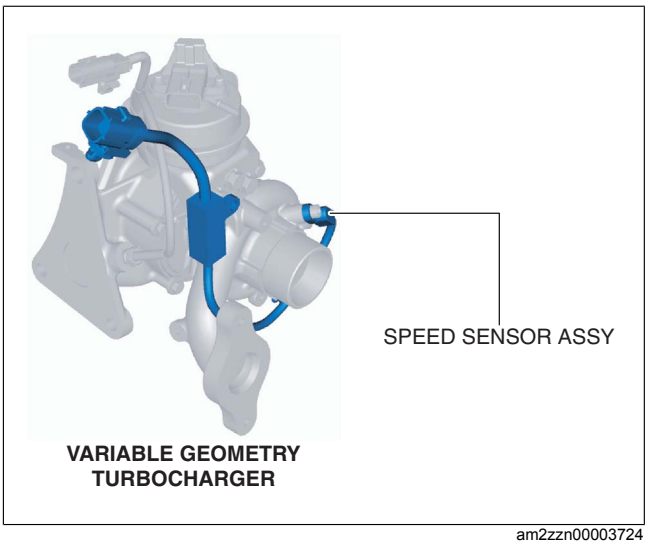

id0140z5439600

### Purpose/Function

- The speed sensor component detects the turbine speed in the variable geometry turbocharger as basic information for mainly boost control.
- Detects the turbine speed in the variable geometry turbocharger and sends the turbine speed to the PCM.

### Construction

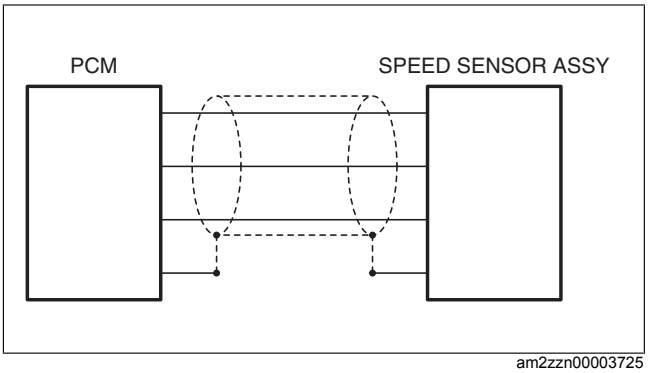

- The speed sensor component of the variable geometry turbocharger is located on the variable geometry turbocharger.
- The speed sensor component of the variable geometry turbocharger has adopted a MR (Magnetic Resistance) element to the detection area for detecting the turbine speed in the variable geometry turbocharger.

am2zzn00003724

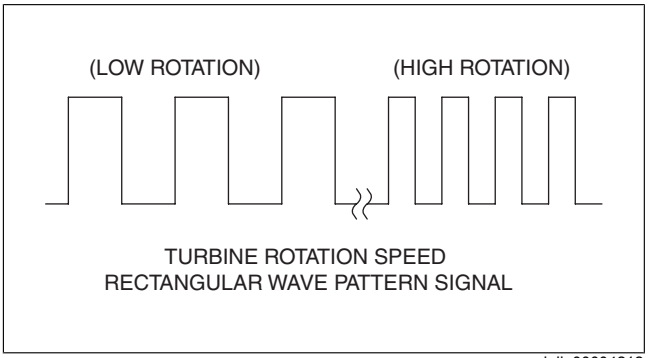

### Operation

- A rectangular wave pattern signal is sent to the PCM which changes according to the turbine speed in the variable geometry turbocharger.

### Speed sensor assy (turbocharger with variable turbine geometry) characteristic

adejjn00004212

### Fail-safe

| DTC No. | Fail-safe function |
|---|---|
| P2580:00 | • Inhibits the EGR control.<br>• Inhibits the auto DPF regeneration control.<br>• Inhibits engine-stop by operating the i-stop function. |
| P2581:00 | |
