CONTROLLER AREA NETWORK (CAN) OUTLINE

id061300247400

- The electric power steering (EPS) control module (CM) sends and receives data to and from other modules via the CAN. For details on the CAN, refer to the [MULTIPLEX COMMUNICATION SYSTEM]. (See MULTIPLEX COMMUNICATION SYSTEM.)

Data sent

- EPS status
- Power steering malfunction indicator light on request
- Power steering warning alarm operation request
- Steering angle (relative angle)
- Steering angle (estimated absolute angle)
- Steering angle (absolute angle)
- Steering torque
- Motor current
- Power consumption

Data received

- Vehicle speed
- Engine speed
- i-stop status
- Wheel-speed
- Steering angle (absolute angle)
- Central configuration data
