EVAPORATOR

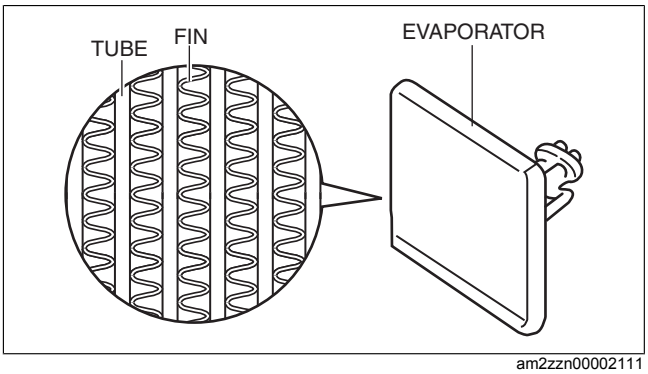

id071100002100

Purpose, Function

- The evaporator circulates low temperature, low pressure gaseous refrigerant inside the evaporator.

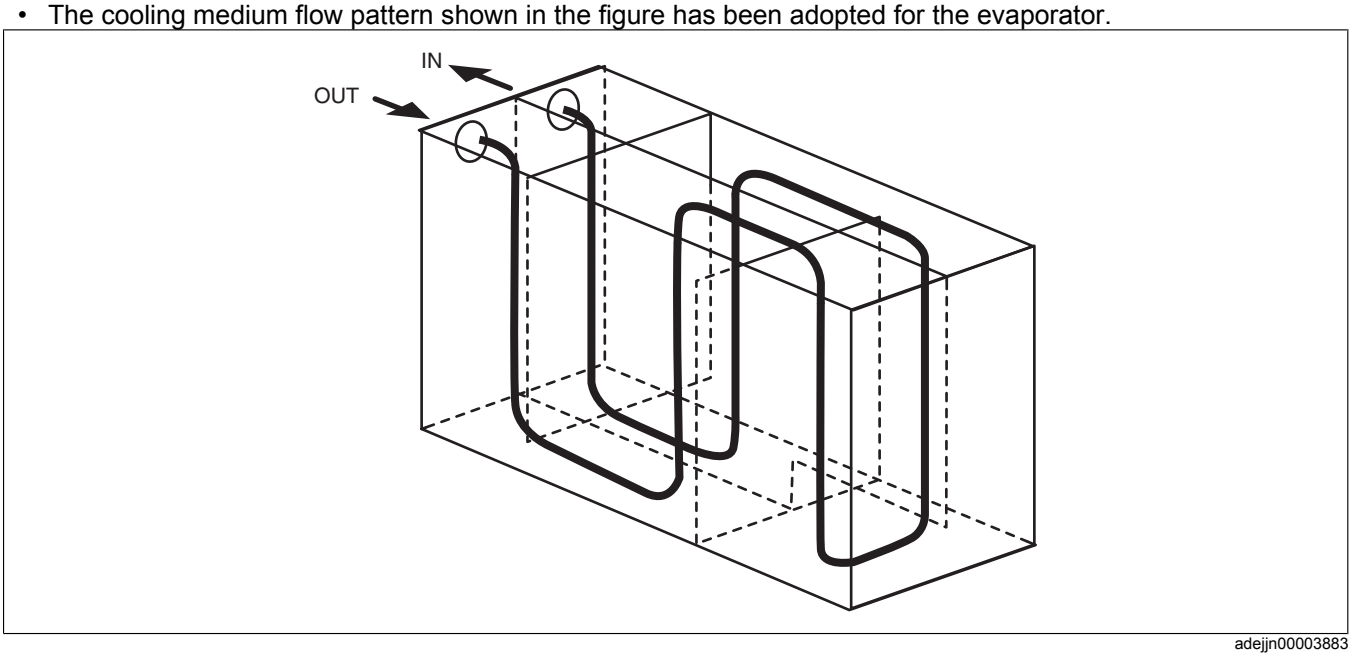

Construction

- The evaporator consists of the tube which passes refrigerant and the heat radiation fins.

am2zzn00002111

- The cooling medium flow pattern shown in the figure has been adopted for the evaporator.

adejjn00003883

Operation

- For the evaporator operation, refer to the REFRIGERANT SYSTEM. (See REFRIGERANT SYSTEM.)

Fail-safe

- Not applicable
