BONNET

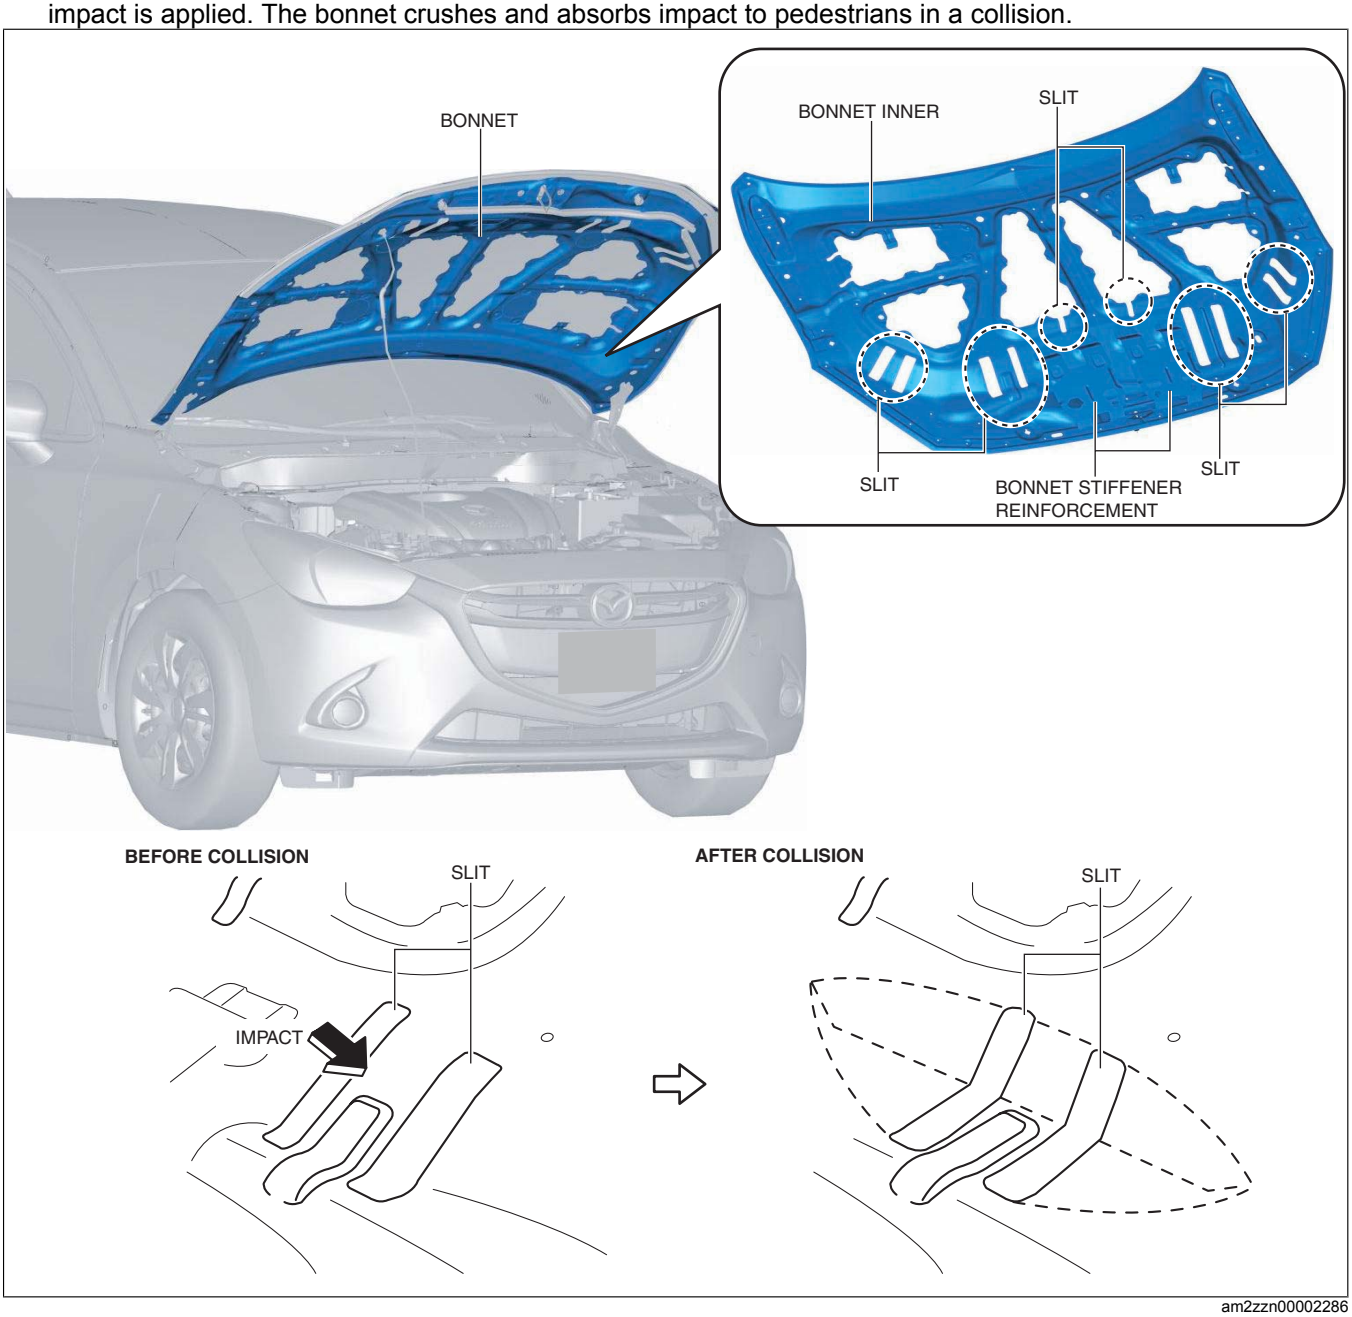

id091000026200

Purpose, Function

- The bonnet has slits to reduce injury to pedestrians in a collision.

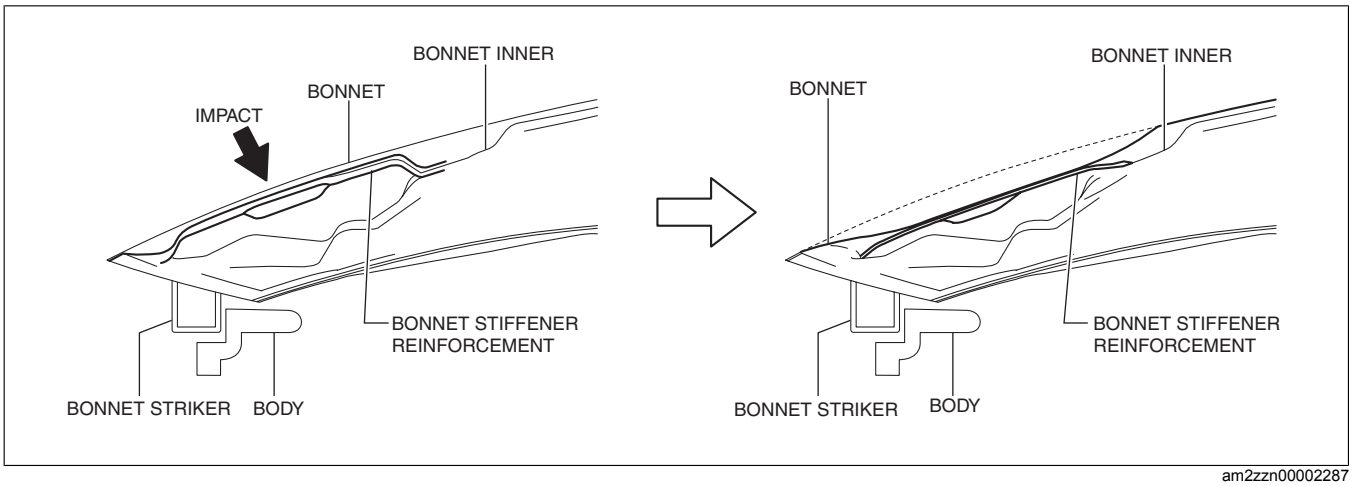

Construction

- By adopting slits to the bonnet inner, rigidity between the slits is lowered and the bonnet crushes easily when impact is applied. The bonnet crushes and absorbs impact to pedestrians in a collision.

am2zzn00002286

- By positioning the bonnet stiffener reinforcement at the front of the bonnet inner, impact to a pedestrian during a collision is absorbed preventing the pedestrian from contacting the bonnet striker and body.
