ENERGY-ABSORBING FORM

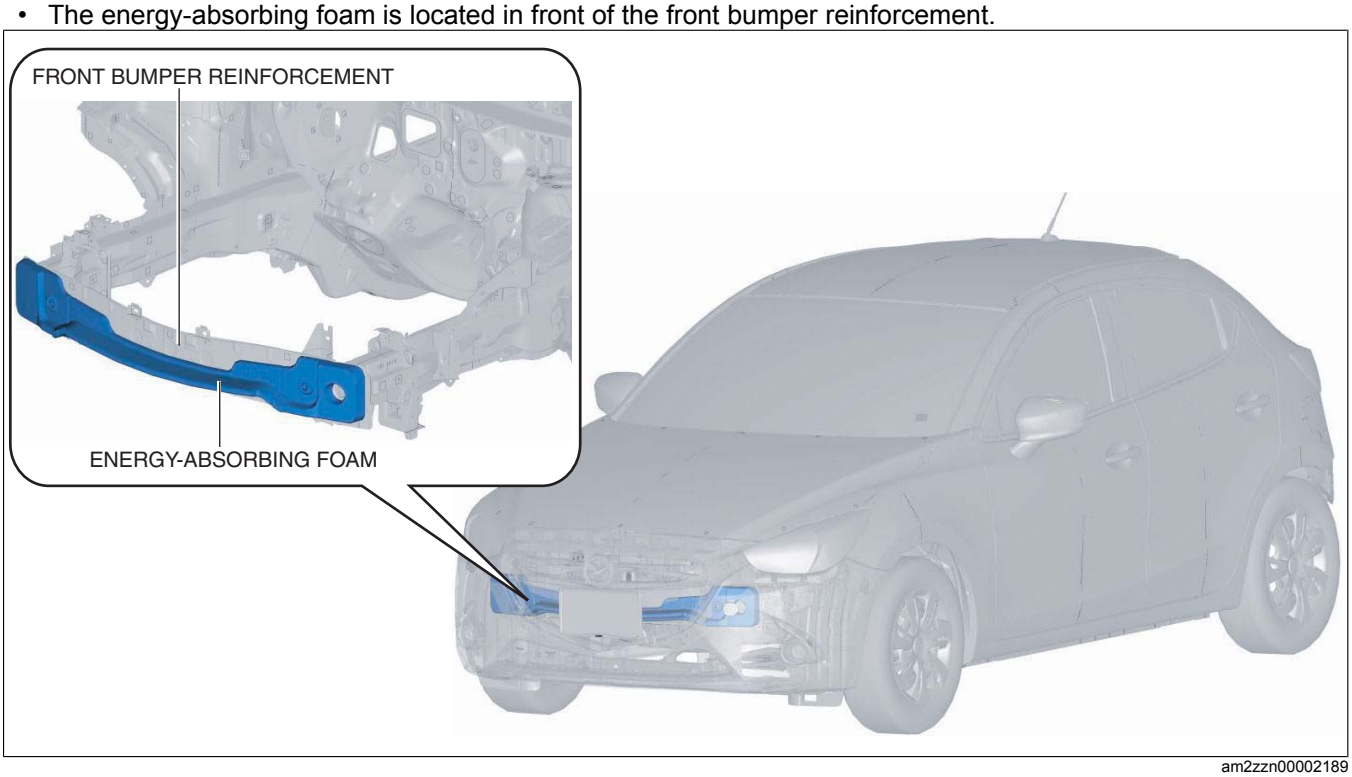

id091000026600

Purpose, Function

- An energy-absorbing foam has been adopted to prevent a pedestrian from contacting the high-rigidity front bumper reinforcement in a collision.

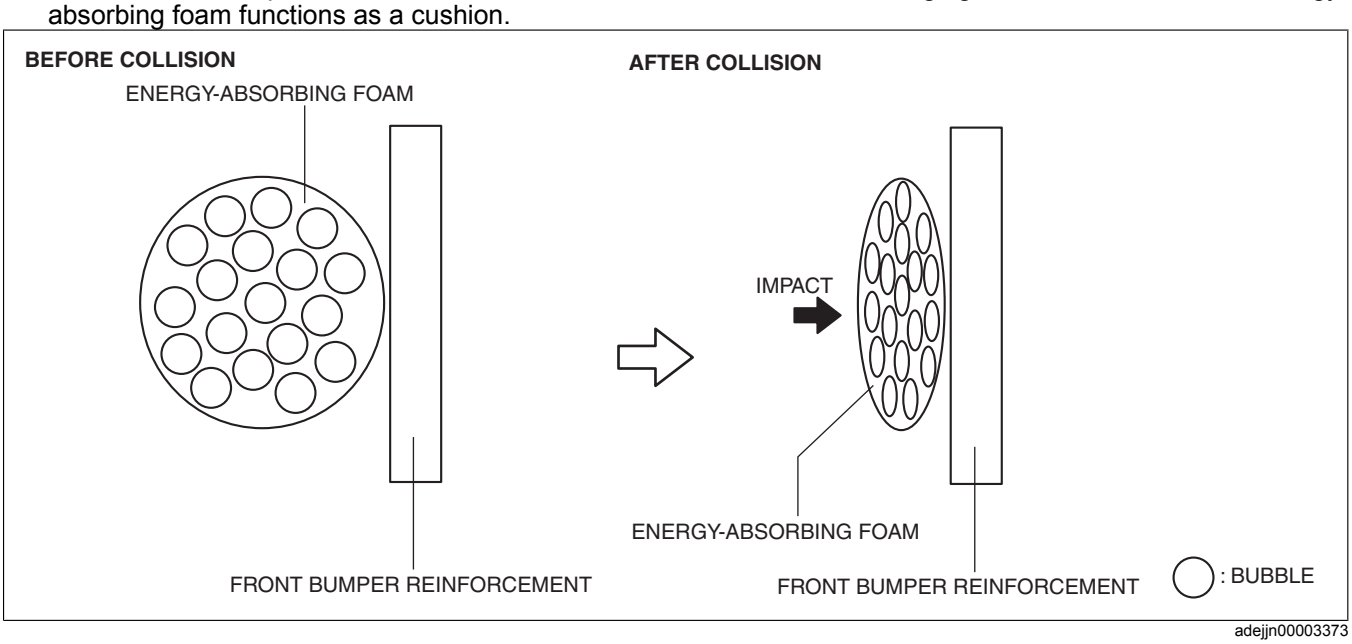

Construction

- The energy-absorbing foam is located in front of the front bumper reinforcement.

am2zzn00002189

- If the vehicle hits a pedestrian, air holes and the hollowed area of the foaming agent are crushed thus the energy-absorbing foam functions as a cushion.
