GLASS/WINDOWS/MIRRORS

id091200012000

Outline

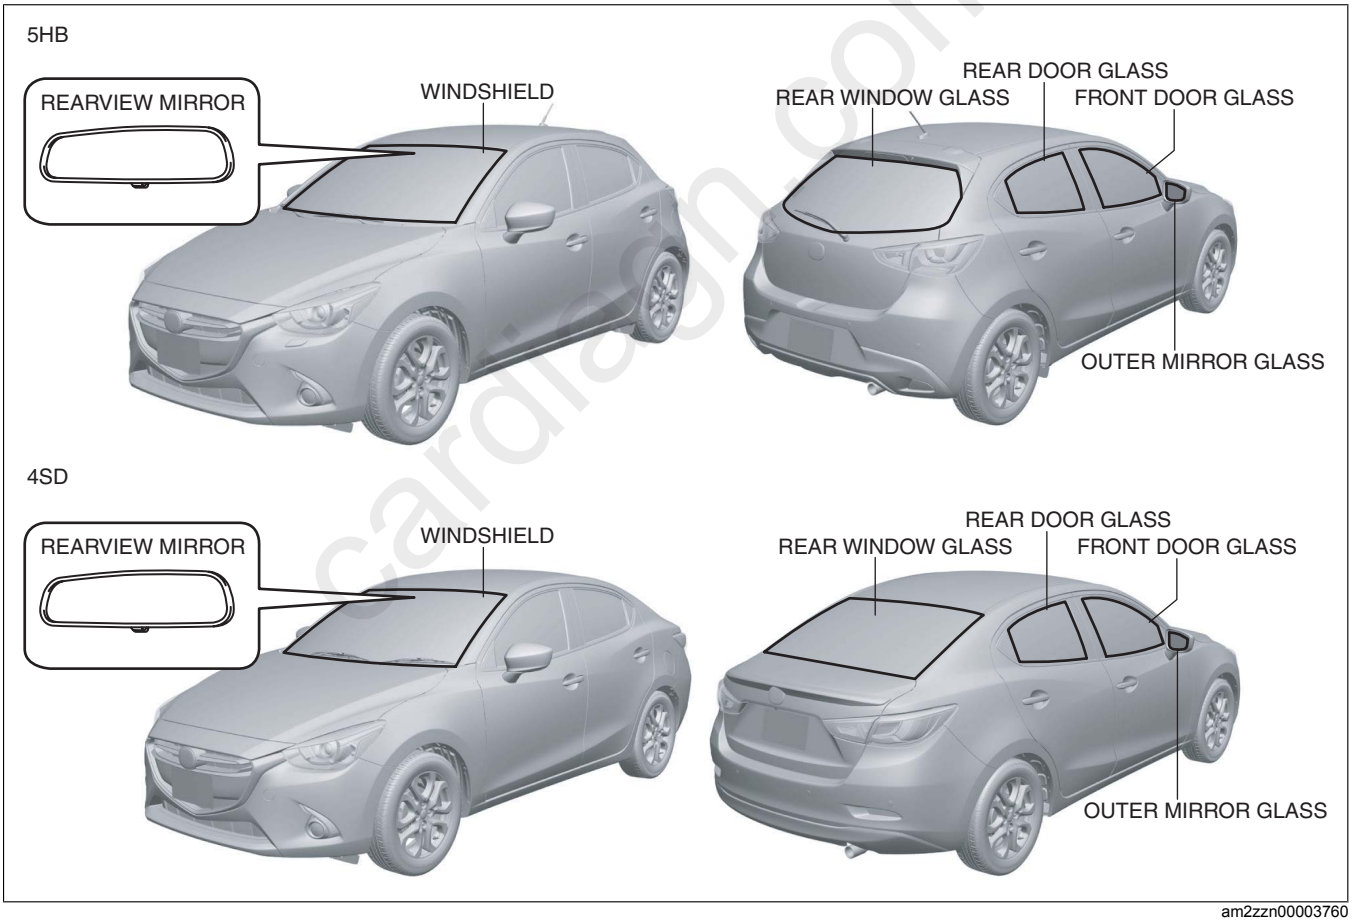

- A power window system has been adopted with which the door glass can be opened/closed electrically by operating the power window main switch or the power window sub switches.
- A power outer mirror system has been adopted with which the outer mirrors can be operated remotely using the power outer mirror switch.
- A rear window defogger has been adopted with which rear window glass fogging can be cleared by pressing the rear window defogger switch.
