SEAT

id091300009300

Outline

Front seat

- High performance, front seat belts have been adopted for the safety of occupants while traveling in the vehicle.
- Front seats which side air bag modules have been adopted to soften the impact to the chest, abdominal, and lumbar areas of the occupants during a collision. (With side air bag) (See SIDE AIR BAG MODULE [TWO-STEP DEPLOYMENT CONTROL SYSTEM].) (See SIDE AIR BAG MODULE [STANDARD DEPLOYMENT CONTROL SYSTEM].)
- An occupancy sensor has been adopted to the front seat on the front passenger seat to determine the seating condition of the front passenger seat.
- A seat warmer system has been adopted which warms the occupants in the front seats by warming the front seat backs and front seat cushions. (With seat warmer system)

Rear seat

- A folding-type rear seat has been adopted which enlarges occupancy space.
- 6:4 split folding-type rear seat has been adopted which can adjust occupancy space according to the size or amount of the luggage.
- The following parts have been adopted to the rear seat to mediate injury to a child during a collision or emergency braking.
  - — ISO FIX anchor
  - — Top tether anchor
- A remote handle lever has been adopted which can unlock the seat back from the trunk side. (4SD)

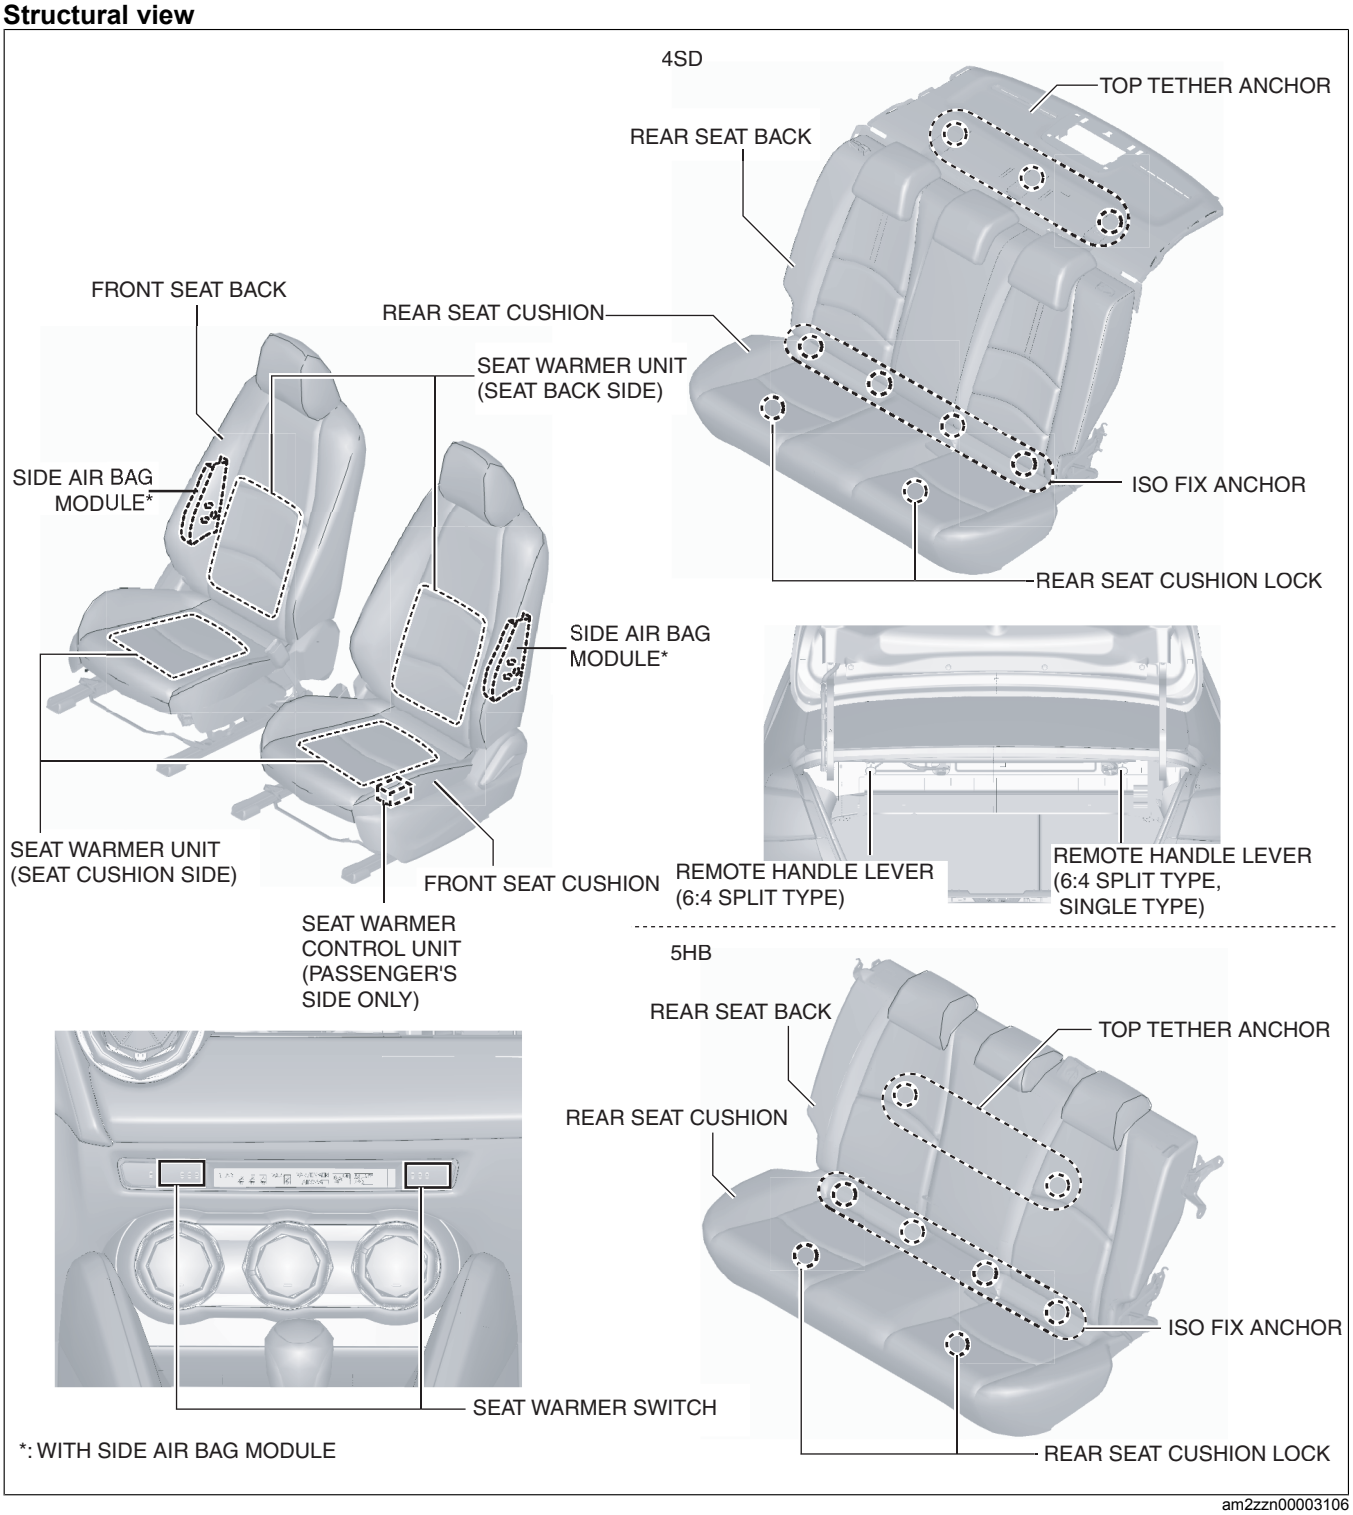

Specification

- The front and rear seat specifications are as follows:

×: Applicable
—: Not applicable

<table>
