LIFTGATE OPENER SWITCH

id091400005900

Purpose
- Transmits the liftgate opener switch operation of the user to the BCM.

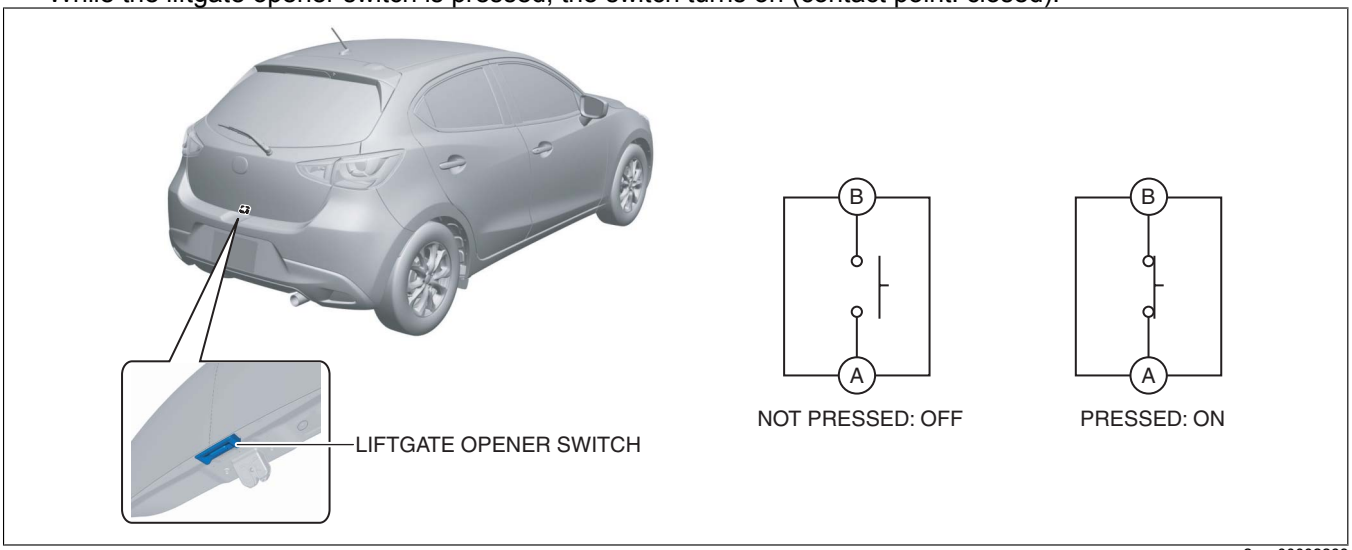

Function
- The liftgate switch on signal is sent to the BCM by operating the liftgate switch.

Construction
- By locating the liftgate opener switch to the liftgate lower end, the operation for pressing the liftgate opener switch and opening the liftgate can be performed simultaneously.
- The shape of the liftgate opener switch allows for uniform application of load using all the fingers of one hand when opening the liftgate.
