DOOR TRIM

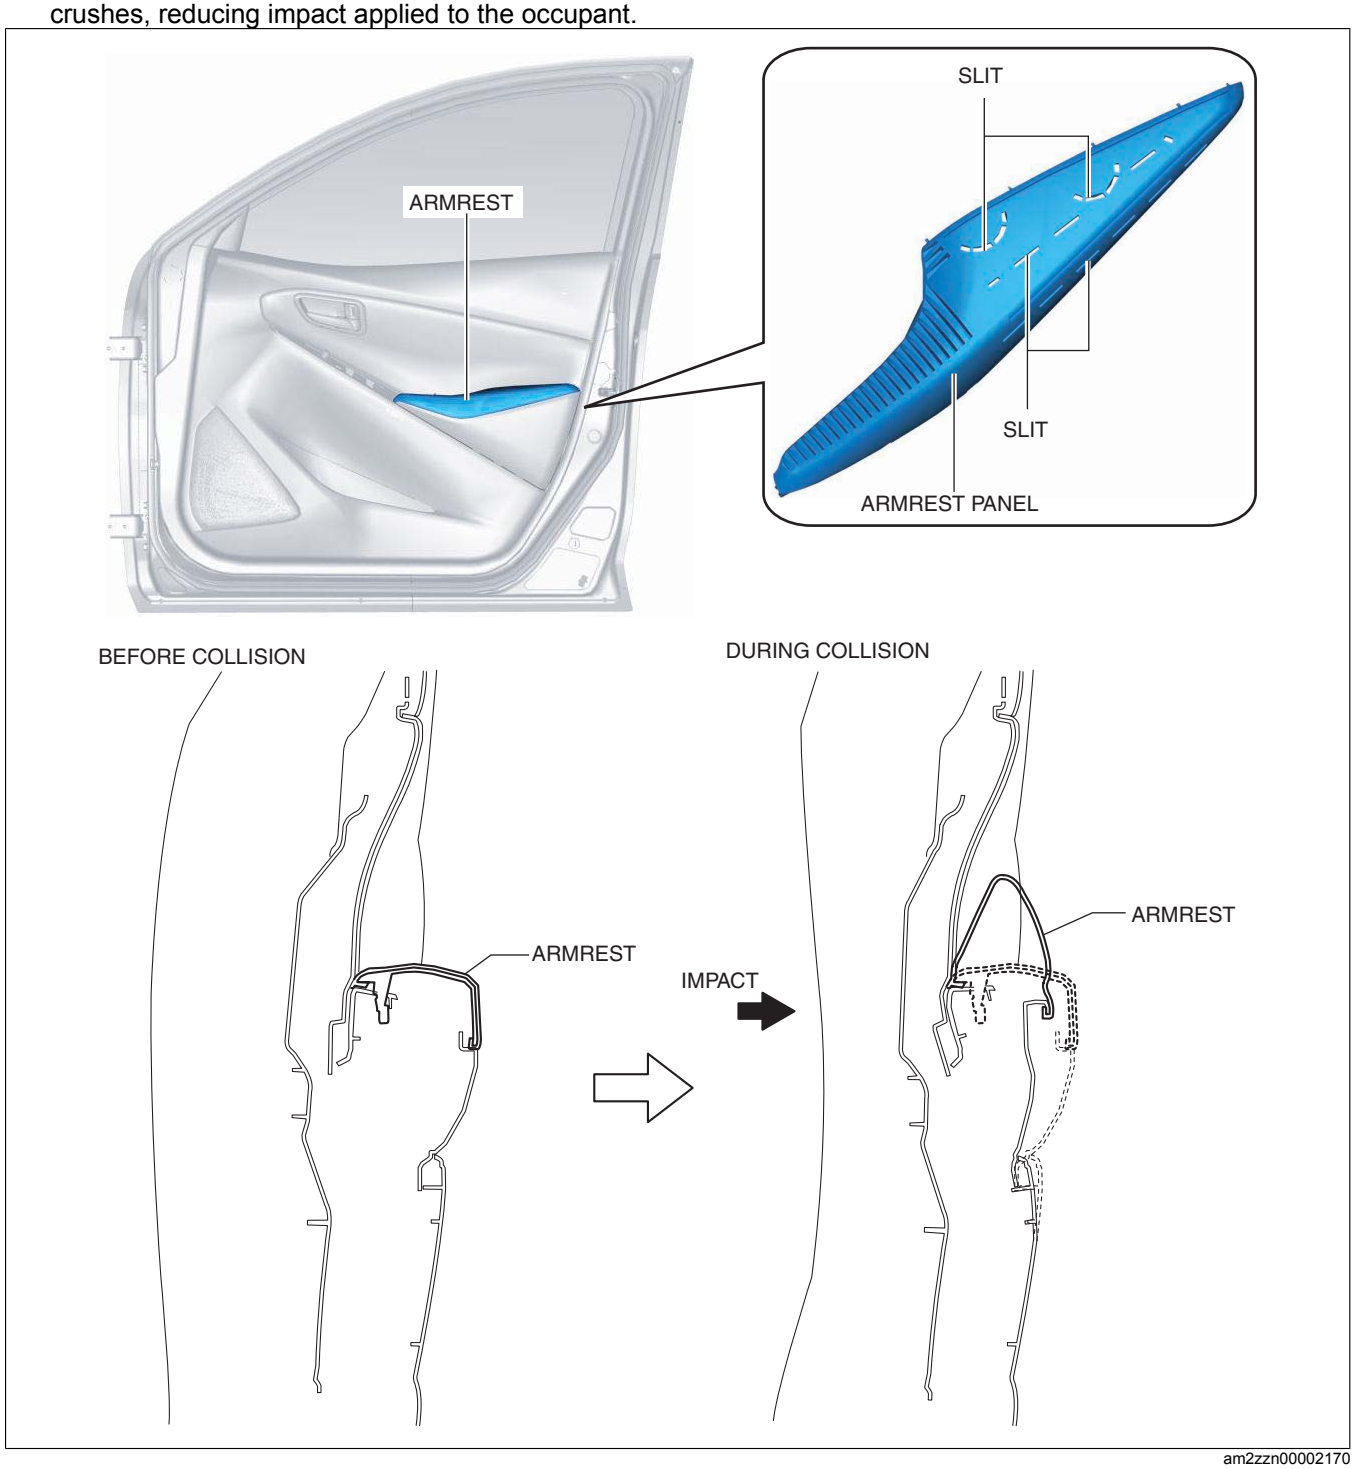

id091700010200

Purpose, Function

- A crushable structure has been adopted to the door trim armrest to reduce impact to the occupants in a collision.

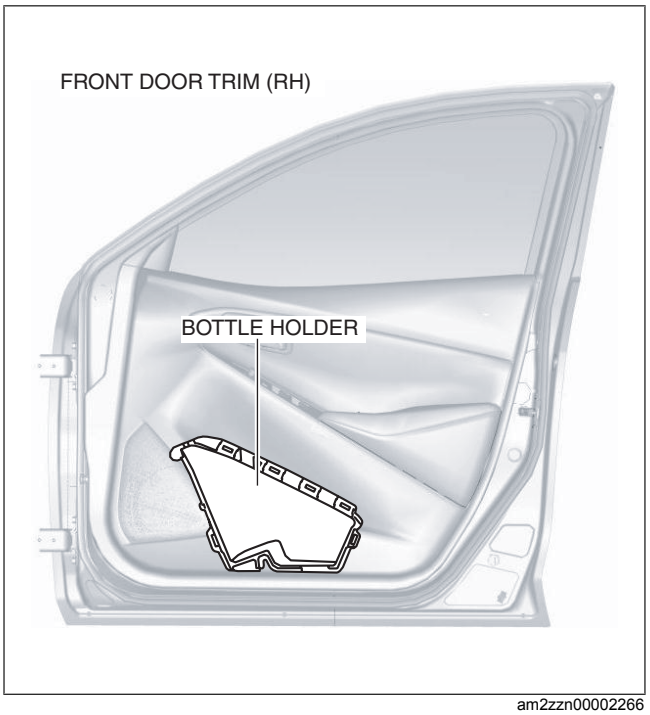

Construction

- A slit has been made in the door armrest panel.
- If the door trim hits an occupant due to a side collision, the slit in the armrest panel deforms and the armrest crushes, reducing impact applied to the occupant.

am2zzn00002170

- A bottle holder which has a storage space of approx. 1.5 L capacity has been adopted to the front door trim.
