CONTROL SYSTEM

id094000001100

Outline

- A BCM has been adopted which performs input controls for the headlights, map light, rear wiper, front washer, and rear washer, and small load input/output controls for the door latch switches, windshield wipers and turn lights.
- An electrical supply unit (ESU) has been adopted which performs high-load output control of the headlights, map light, door lock actuators, rear wiper, front washer, and rear washer.
