Installation Procedure

4SD

1. When installing new parts, measure and adjust the body as necessary to conform with standard dimensions.
2. Drill holes for the plug welding before installing the new parts.
3. After temporarily installing new parts, make sure the related parts fit properly.
4. Cut and join the 1 location indicated by (A) shown in the figure.
5. Plug weld the 120 locations indicated by (B) shown in the figure, then install the rear floor panel.
